## Total gas monitoring solutions for enclosed spaces within commercial buildings, manufacturing facilities, parking structures or outbuildings.

MicroWatt is a factory-certified commercial gas detection and burner controls distributor with over 30 years serving Western Canadian clients with complete turnkey solutions.

Health and Safety Standards regulate that gas detection devices must be calibrated annually to ensure that the sensor accuracy and system functionality is within factory standards.

Enjoy the piece of mind knowing that your detection system is protecting your investment by having MicroWatt certified technicians verify and calibrate your systems.

## MicroWatt is your Canadian representative for these world renowned products:

MicroWatt offers a wide range of service contracts for your gas detection needs. Whether you have an existing system, or are planning a new one, we have the capabilities and experience to build a custom solution that will optimize the performance within your application. We work closely with every client to simplify safety and compliance while improving their bottomline.
