 ROBOTICS

Meet **ANYmal**, Your new inspector

**Mobile in
complex
Facilities.**

**Superhuman
senses**

ANYmal's legged design and **AI-driven mobility** deliver exceptional agility and performance, making it ideal for **navigating complex, dynamic environments with advanced obstacle avoidance.**

- Visual Camera
- Ultrasonic Microphone
- Thermal Camera
- Can carry an additional 10kg payload.

**Transform
inspection data
into insights.**

MWbotics

The ExR-2.5 is built for remote, harsh and hazardous conditions.

- IECEx & ATEX Zone 1 certified.
- Operating temperatures -40 °C to +55 °C.
- Resists Corrosion by salt water, hydrocarbons, hydrogen sulphide and acidic liquids.
- Perform missions lasting between 2 and 6 hours.

AI powered detection

- No digital twin is required; robots create their evergreen twins.
- Remote control of robots and onboard sensors for ad-hoc inspections.

EX ROBOTICS

Sorاما makes acoustic equipment for the early detection of gas leaks.

Why choose Sorاما:

- Preventive inspection.
- Safety in high-risk environments.
- Non-intrusive inspection
- Cost savings and efficiency.
